Rushikesh Kale **Senior Software Developer**

Pune, Maharashtra, India | +91 – **7972391051** | **rushikeshkale7287@gmail.com** | **LinkedIn** | **GitHub**

PROFESSIONAL SUMMARY :

Salesforce Developer with 3+ years of experience delivering scalable, integration-driven solutions using Apex, LWC, Trigger Frameworks, Flow Orchestration, Security & Sharing Model and Asynchronous Apex. Strong expertise in REST/SOAP integrations, Design Patterns, Bulkification, and Governor Limit optimization. Experienced in CI/CD pipelines and Release Management. Proven ability to lead small technical team, gather business requirements, and enterprise-grade solutions designed to integrate seamlessly within existing systems while ensuring future scalability. Actively leveraging AI tools and System Design principles to drive development efficiency and high-performance architectural thinking.

SKILLS AND CORE COMPETENCIES :

- **Salesforce Development:** Apex, Lightning Experience(LWC), Aura Framework, Visualforce, Trigger Framework, SOQL/SOSL.
- **Automation:** Flows (RTF, Screen, Scheduled, Autolaunched), Process Builder, Workflows.
- **Asynchronous Apex:** Batch, Queueable, Future, Schedulable.
- **Integrations:** REST, SOAP, Platform Events, Continuation Callouts, JSON/XML, API Integration, Named Credentials, Remote Site Settings, Integration Patterns.
- **DevOps and Tools:** Salesforce DX, Azure Pipelines, Git, GitHub, Change Sets, VS Code, Environment Management
- **Security and Configurations:** Roles, Profiles, Permission Sets, Sharing Rules, Custom Metadata/Settings/Permissions/Label, Apex Sharing
- **Testing:** Apex Test Classes, Code Coverage, Performance Optimization
- **Other Tech :** React Basics, System Design(learning), Azure Functions
- **AI and Tools**: GitHub Copilot, ChatGPT, Claude, Copilot Studio.

EXPERIENCE :

Senior Salesforce Developer | Bajaj Finance Ltd. | Nov 2022 to Current Date

Responsibilities:

- ***Collaborating*** with business stakeholders in ***Agile*** ceremonies (daily stand-ups, sprint planning) to gather, analyze, and translate requirements into scalable Salesforce solutions.
- ***Leading end-to-end*** Salesforce development lifecycle for new product journeys, ensuring robust architecture, optimized Apex code, and Lightning component implementation.
- ***Mentoring*** junior developers through technical guidance, peer code reviews, and enforcing Salesforce coding standards and best practices.
- ***Troubleshooting*** and ***resolving production incidents***, performing ***root-cause analysis***, and implementing performance-optimized fixes to maintain platform reliability.
- Managing CI/CD deployments using Azure Pipelines, GitHub, Salesforce DX, and Change Sets across sandbox and production.

Highlights:

- Led the ***POS Loan Project*** (UI/UX + backend revamp) resulting in a ***30% improvement*** in customer satisfaction and ***18% reduction*** in page load time through optimized LWC and Apex refactoring.
- Designed and delivered the complete POS 2.0 product lifecycle using ***GIT+ GITHUB + Azure DevOps***, ensuring zero-defect go-live through structured UAT and automated validations.
- Implemented ***Singleton, Selector, Trigger Handler Design Pattern*** in Apex services, reducing redundant SOQL queries and improving system performance and scalability.

- Delivered the ***E-Mandate Automation Project***, integrating Salesforce with banking systems to streamline customer mandate processing and reduce manual dependencies.
- Improved operational efficiency by ***integrating*** multiple third-party ***REST APIs***, enhancing data accuracy, throughput, and system reliability. Extensive use of ***Platform Events*** and ***CDC***.
- Contributed to ***RBI Compliance*** Enhancements by implementing secure transaction handling, audit-ready logging, and platform governance controls

CERTIFICATIONS:

1.Salesforce Platform Developer I *2.Salesforce Administrator* *3.Salesforce Agentforce Specialist*

EDUCATION:

Post Graduate Diploma in Advanced Computing – Sunbeam Institute of Information Technology, Pune
(Mar 2022 – Sept 2022)

REWARDS AND RECOGNITION :

1.BFL Prodigy *2.Developer of the Quarter – Tech Star Award*

KEY PROJECTS AND LEARNINGS :

1. POS 2.0

UI Revamp • Team Lead Opportunity • Scalable Solution
Led UI revamp and designed a scalable solution that fit into the existing system.

---

2. NTB Loan POD

Platform Event Integration • Solution Design
Implemented platform event integration and designed a solution aligned with the existing use case.

---

3. GitHub Migration

Azure → GitHub • Workflow Setup • SFDC CLI
Migrated from Azure to GitHub, created workflows, and worked with Salesforce CLI.
